Sample: Neonatal Resuscitation Course

Actual implementation may vary depending on the specific needs of the local partners

Structure

- Teach four one-day Neonatal Resuscitation course to 15 to 20 healthcare providers each day (60 to 80 total participants). Healthcare providers learn and implement the correct way to resuscitate a baby after birth.

Course Description

A selection of the following modules will be covered. Modules include both lecture sessions and hands-on workshops and simulations to develop skills.

- Lecture Neonatal Resuscitation
- Additional Physiology
- Practice ventilation techniques
- Practice cardiac massage
- Talk on cleaning equipment
- Scenario practice

Assessment of Participants

Facilitators will continually assess the performance of the participants throughout the course, addressing the participants' strengths and weaknesses while helping them build upon the skills they already possess. Pre- and post-course knowledge assessments and confidence measurements will be used to quantify improvement in participants before and after the course.
